

BAGUIER

Comment mesurer votre tour de doigt ?

ATTENTION: la taille des doigts varie souvent d'une main à l'autre.

Munissez-vous d'une bague, par exemple une alliance.

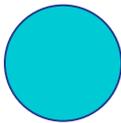

Posez votre bague sur les cercles ci-dessous. Si l'intérieur de votre bague correspond à l'extérieur du cercle, c'est votre tour de doigt.

Les bagues en argent, plaqué or et acier sont disponibles uniquement en tailles paires.

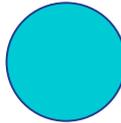

exemple: si votre doigt a une taille 53, vous devez commander une taille 54.
